

Whether you need new content created or an assessment of your existing libraries, UNIFI has the content expertise to maximize the value of your BIM assets.

UNIFI offers services designed to accelerate your firm’s return on your investment in BIM, including:

CONTENT LIBRARY STRATEGIC CONSULTING

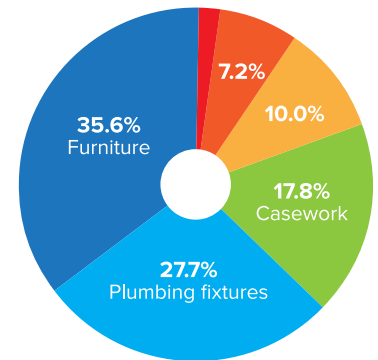

Assess the health of your Revit content library

What is it

- Review existing Revit Standards and accompanying assets (shared parameter files, subcategory lists etc.) and discuss known library issues/short comings
- Review library via UNIFI Cloud Analysis tool
- Discuss results and review what ‘good’ content looks like for your firm
- One hour free consultation, additional hours charged via Content Credits or hourly fee

Results

- A strategic roadmap to improve the overall quality and productivity of your content library
- Ability to plan for budget and schedule services to reach desired content goals

Revit Content Library Summary

CONTENT LIBRARY UPGRADES

Take your existing content to the next level

What is it

- Focus on high value upgrades based upon Strategic Library Consulting session

Results

- Increase in the quality of your Revit content
- Less time spent finding content means more time generating output
- A competitive advantage by increasing your firm’s productivity/profitability, as well as being able to produce superior BIM deliverables

“With UNIFI, we have a way to contain content as a single point of truth.”

– Guy Messick,
Director of Design Intelligence

Depend on UNIFI to assist with your BIM content needs and allow your team to focus efforts on what they do best – designing, building and operating buildings.

NEW CONTENT & LIBRARY CREATION

Increase your firm's project win rate by establishing unparalleled design documentation efficiencies and quality

What is it

- Create high value libraries based upon Strategic Library Consulting session
- Mutually set SOW that aligns your firm's business objectives to the Revit content library being developed

Results

- Revit content that has been tailor-made to your firm's requirements
- More time for your employees to concentrate on billable hours
- A competitive advantage by increasing productivity & profitability, in addition to producing superior BIM deliverables

CONTENT ON DEMAND

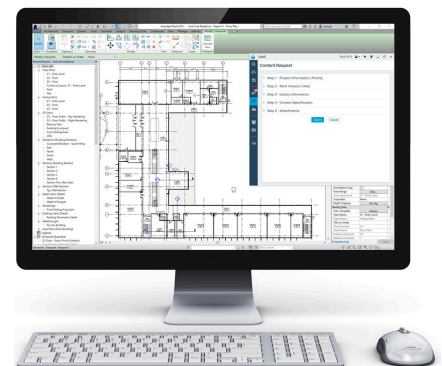

Get high quality content whenever you need it

What is it

- Simple content request framework via UNIFI platform
- Carefully tracked and transparent cost tracking
- QA Tested
- Delivery via UNIFI platform

Results

- Quality "project ready" Revit content delivered in a timely manner
- Reduced risk of project overrun fees that eat into project profit margins

"Having access to a service that interrogates significant volumes of content and generates reports identifying areas for improvement is a highly valuable prospect."

– Melanie Tristram, National BIM Manager

ABOUT UNIFI:

UNIFI is the essential cloud platform to create and manage Revit and digital building content. The UNIFI content creation team utilizes a unique blend of industry knowledge and proven expertise to create the highest quality BIM assets along with maximizing the investments in existing assets. The UNIFI content management platform ensures data consistency and anywhere access to BIM content – across teams and global offices.
